

Many of CRG's providers are available for speaking engagements or professional development/training events. We bridge the gap between current scientific knowledge and daily clinical care. If you or your group would like to retain one of our providers as a presenter for your next event or gathering, please contact:

Dr. David Parker
Phone: 317-575-9111 Ext. 146
Email: dparker@childrensresourcegroup.com

Dr. Parker will work with you to identify a CRG speaker, coordinate logistics and payment and, if desired, help you shape your agenda. The provider will then contact you to finalize discussions in order to tailor the presentation to your specific needs.

Costs

Presentation Formats and Associated Costs:

1 hour talk	\$500
3 hour workshop	\$1250
6 hour training	\$2000

To learn more about our providers, visit <http://www.childrensresourcegroup.com/our-team/>. Continue reading for a taste of the topics our speakers can address. We can also develop talks on other topics that better suit your needs.

What Is the Speakers' Bureau?

Several of CRG's clinical providers offer presentations and/or professional training services through our Speakers' Bureau. The Speakers' Bureau is designed to deliver the most current clinical research and best practice information to assist physicians, mental health professionals, educators, and families in providing relevant, high-quality care and educational services. Some of our many presentation topics include:

- Autism Spectrum Disorders
- ADHD Across the Lifespan
- Disability Documentation/Transition to College
- Helping Children/Teens with Mood Disorders

The Speakers' Bureau is multidisciplinary and includes psychiatrists, clinical psychologists and a postsecondary disability specialist. Together, our providers combine years of experience with current research data to provide an array of services such as diagnostic assessment, pharmacological management, therapy, and educational services. They specialize in working with people of all ages who have learning disorders (such as LD, nonverbal LD, ADHD, and Asperger's), mood disorders (such as depression, anxiety, and OCD), or other issues that complicate healthy, productive lives.
